

Community Supported Agriculture

A Community Supported Agriculture (CSA) program is a method of marketing fresh vegetables where the Farmer and Consumer share the risks associated with farming, and the cost of production. The consumer gets a weekly share of fresh local produce. You, as a Consumer, become a shareholder and will pay in advance for your share of fresh produce direct from the garden throughout the harvest season. This direct relationship with the Farmer serves to strengthen rural-urban ties on the basis of food production that is fresh and local.

Pre-paid in the Spring and enjoyed all Summer and into the Fall. We have a limited number of shares available.

Send an email request to enroll.

Growing Minds Teacher Testimonials

The Growing Minds programs at Neubauer Farms are amazing! You can't teach kids about farms and where their food comes from by playing with plastic animals, tractors and fake food. They need to be involved... hands on... senses engaged... exploration encouraged!! Neubauer Farms provides this experience in such a way that it will make a lasting impression on these kids

Myself, my students and their families have been talking about this fieldtrip for almost a month now. We loved the pumpkin patch, garden, animals and farm/fall centers. Farmer Tanya and Farmer Nichole were incredible with the kids - true naturals! I have recommended this fieldtrip to my entire school staff since. I plan to take all of my classes in the future as its not only fun, its also educational!

CSA Member Testimonial

One of the best investments we have ever made, was our purchase of a share in the Neubauer farms 2013 CSA Not only was it an investment in some incredible fresh food, but it was a direct investment in our girls. I now have two girls who are constantly asking where their food has come from. Nothing grabs a child's attention, or gives them the look of pure joy like a giant pile of pumpkins, a huge stalk of swiss chard, or the chance to collect an egg from somewhere other than a supermarket shelf. This is the best chance we have to propagate a real understanding in our kids, of so many great things that we often take for granted, and we are so very happy to have had the opportunity.

Agriculture Education Program

Brought to you in partnership with:

Ag for Life

Spring Fun on The Farm

Spring is an exciting time on the farm. Visitors will have the opportunity to learn about the special farm activities associated with the spring season.

Example activities may include: Making the goats a special “salad”, bottle feeding a baby calf, feeding the pigs, gathering eggs, learning about wheat by exploring wheat berries, planting a make and take wheat plant, milling wheat into flour to make dough and learning about what products are made from crops that grow in our area.

Field trip length: 90 minutes

Offered: May and June

Adventures in the Pumpkin Patch

Visitors will learn about the pumpkin growing process and will have the opportunity to harvest pumpkins from the farm’s pumpkin patch.

Example activities may include: Learning about the pumpkin growing process through interactive storytelling, exploring oilseeds and grains, feeding animals, harvesting pumpkins, a make and take craft activity and hands-on exploration of the inside and the outside of a pumpkin. Each group will pick a pumpkin to take back to school.

Field trip length: 90 minutes

Offered: September—October

Our Farm - Your Classroom and Inspiring Education

Neubauer Farms is pleased to offer the farm as a “Community Classroom” for educators throughout our region.

This concept allows for teachers to book multiple full-day visits to the farm. With endless opportunity for curriculum connections, students who visit the farm become engaged thinkers, problem solvers and active participants in their learning.

Looking for a means of teaching “Entrepreneurial Spirit”?

Then you may like to participate in a multi-day Community Classroom complete with a student-led Farmer’s Market or Pumpkin Stand
